## PROJECTS

### Monster Bill Project(P2P) (03/2023 - Present)

- I am actively involved in the Monster Bill project at Monster Jobs. Our team is developing a customized system using Java 11, Spring Boot, PostgreSQL, and leveraging AWS cloud services. My primary responsibility revolves around creating and enhancing RESTful APIs with Spring Boot, as well as implementing and modifying business logics to align with project requirements. This automation-driven purchase flow from supplier creation to payment processing aims to streamline the entire P2P Flow.

### CCPL Project Management System (05/2023 - Present)

- Using Spring MVC and java and with database as Oracle and implemented excel file upload into database and view those data in front end and download excel of those data into machine And Creating RestAPIs.
